

SINGLE PLAYER RULES!

An earlier version of the game had a single player "solitaire" style mode, but it was removed because it was very hard to balance alongside the 2-player game.

However - if you're up for it, grab a d6 (or a dice roller app) and set yourself up as the Moon.

Then, whenever it's the Earth's turn, draw 3 cards one at a time. If the card has the potential to be upgraded, roll your die and use the reference below:

- 1-3:** Consider it the base card, no upgrade.
- 4-5:** Consider it the 2 card upgrade.
- 6:** Consider it the maximum power upgrade!

If you need to target a project or an employee, try to challenge yourself - what would you target if you were the Earth?
